

Order & Registration Form

Insight Communicator

Registering Insight Communicator

You need to register Insight Communicator to use it in conjunction with Insight. If you do not register Insight Communicator, you will not be able to log on.

1. Run Insight Communicator. By default, this would be Start > All Programs > Inner Range > Insight Communicator > Insight Communicator Client
2. At the Insight logon box enter your logon User Name and Password then select Log On or select Cancel to launch the registration screen. *(The User Name and Password required is one linked to an Operator in Insight with permissions to access the module 'COM Interface')*
3. From the Communicator start up registration screen select "Open the Communicator registration form" and then either fill it out electronically or print page 2.
4. Copy the serial number displayed in the Communicator start up registration screen onto the Communicator details section of the registration form. You will also need to fill in the serial number of the Insight Installation that this copy of Communicator will connect to. Complete all details on the form and send it to your Inner Range Distributor using the contact details on page 3.
5. Once the registration details have come back from your distributor or Inner Range, open the "License Manager" application from the Insight Professional Launch Pad and "Add" the "Client Verified License Key" to the list and the "Additional Client Key" if supplied and then exit the Licence Manager screen.
6. Repeat Steps 1 and 2 as above to open the Communicator start up registration screen. Complete the case sensitive "Registered to:" and "License number:" fields and then select "Register".
7. The "Register" button will become inactive when registration is complete.

Insight Communicator Registration Form
